

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A panel-type speaker mounting structure comprising:
a liquid crystal display (LCD) window having a first surface exposed on a top end of an upper casing frame of a main body and a second surface facing an interior of the main body; and
an LCD module disposed under the LCD window with a gap between the LCD module and the LCD window within the main body, the LCD module having a polarizing plate having an upper surface facing the second surface of the LCD window and a lower surface opposite the upper surface, the polarizing plate being divided into a first portion located adjacent to the LCD window and a second portion extended from the first portion, for mounting a panel-type speaker to the lower surface of the second portion of the polarizing plate,
wherein the second portion of the plate is extended in a predetermined direction below the LCD window away from a top portion of a device.

2. (Cancelled)

3. (Previously Presented) The panel-type speaker mounting structure of claim 1, wherein the polarizing plate is made from a polarizing material.

4. (Cancelled)

5. (Cancelled)

6. (Cancelled)

7. (Cancelled)

8. (Cancelled)
